Re: WC Dkt. Nos. 13-97, 04-36, 07-243, 10-90 and CC Dkt. Nos. 95-116, 01-92, 99-200

Dear Ms. Dortch:

Attached is a report filed on behalf of SmartEdgeNet, LLC (dba Edge Communications) ("SEN") pursuant to paragraphs 99 and 103 of the *Notice of Proposed Rulemaking, Order, and Notice of Inquiry*, 28 FCC Red 5842 (2013), in the above captioned proceedings. In particular, the Commission required trial participants, such as SEN, to begin filing monthly reports sixty days after their requests for direct access to numbers from a numbering administrator that contain (1) the total of new numbers placed in service; (2) the total number of port-in requests, including existing as well as new customers) and the percentage of successful port-ins; (3) the number of port-out requests from a number held directly by the trial participant and the percentage of successful port-outs; (4) the total number of routing failures and the causes of such failures; and (5) a description of any billing or compensation disputes. SEN first submitted its request for direct access on July 27, 2013. Accordingly, SEN submitted its first report on September 25, 2013 and its second report on October 25, 2013. It submits this, its third report, thirty days thereafter.

Please direct any questions about this report to the undersigned.

Respectfully submitted,

A handwritten signature in blue ink that reads "Randall B. Lowe" with a stylized flourish at the end.

Randall B. Lowe

11/25/13 Number Access Report of SmartEdgeNet, LLC (dba Edge Communications)

As of 11/25/13, (1) the total of new numbers placed in service is zero; (2) there are no port-in requests and the percentage of successful port-ins is therefore zero; (3) there are no port-out requests from a number held directly by SEN and the percentage of successful port-outs is therefore zero; (4) there have been no routing failures; and (5) there have been no billing or compensation disputes.

On 10/15/13, trial numbers went live in NPAC; voice testing began and IXC interstate traffic has completed to SEN's network without issue. Local and toll calls are completing from incumbent lines tested in Key West, FL and Dallas, TX.

One TN has been assigned for LRN and one for testing in the Key West, FL rate center; one TN has been assigned for LRN and eleven for use by SEN in the Dallas, TX rate center; and one TN has been assigned for LRN and one for testing in the Celebration, FL rate center.

SEN has completed its negotiations with Smart City Telecom for Celebration, FL and AT&T for Celebration, FL, Key West, FL and Dallas, TX. It expects shortly to complete its negotiations with Verizon for Celebration, FL. It has been unable to complete its negotiations with CenturyLink for Celebration, FL because CenturyLink insists as a matter of "policy" that SEN purchase separate trunks from CenturyLink even though separate trunks are not required. As a result, CenturyLink end users are not able to terminate calls to SEN end users.
