

December 6, 2013

Ms. Marlene H. Dortch
Federal Communications Commission
Office of the Secretary
445 12th Street, S.W.
Washington, D.C. 20554

RE: *Numbering Policies for Modern Communications*, WC Docket No. 13-97, *IP-Enabled Services*, WC Docket No. 04-36, *Telephone Number Requirements for IP-Enabled Services Providers*, WC Docket No. 07-243, *Telephone Number Portability*, CC Docket No. 95-116, *Developing a Unified Inter-carrier Compensation Regime*, CC Docket No. 01-92, *Connect America Fund*, WC Docket No. 10-90, *Numbering Resource Optimization*, CC Docket No. 99-200

Dear Ms. Dortch:

Pursuant to paragraph 103 of the Notice of Proposed Rulemaking, Order, and Notice of Inquiry issued in the above-captioned proceedings on April 18, 2013 (“Order”), the Commission required trial participants to begin filing monthly reports sixty days after their initial request for direct access to numbering resources. Millicorp submitted its first report on October 6, 2013, its second report on November 6, 2013, and hereby submits its third report, thirty days thereafter.

On October 4, 2013, Millicorp’s trial numbers went live in LATA 912 (Savannah, GA), and numbers have begun being placed in production. On November 4, 2013, the trial numbers went live in LATA 561 (Boca Raton, FL), and voice testing has been completed. Millicorp has not been able to reach agreement with CenturyLink in LATA 239 (Fort Myers, FL). CenturyLink was not willing to amend its interconnection agreement with Millicorp’s CLEC partner to deliver PSTN-originated traffic to Millicorp over existing trunks. Instead, CenturyLink has requested that Millicorp purchase dedicated TDM trunks in Fort Myers and enter into a direct agreement with CenturyLink for the exchange of TDM voice traffic. Millicorp will not be able to begin testing numbers in the Fort Myers market until an agreement with CenturyLink is reached.

In respect to the specific reporting categories setup forth in the Order, as of December 6, 2013: (i) forty (40) numbers has been placed in service by the provider; (ii) the total number of port-in requests (including current customers) is zero and therefore the percentage of successful ports-in is zero; (iii) the number of requests to port out a number the provider holds directly is zero and therefore the percentage of successful ports-out is zero; (iv) the total number of routing failures is zero, and therefore no causes of said failures; and (v) there have been no billing or compensation disputes.

Please do not hesitate to contact me with any questions regarding this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Duane Dyar', written in a cursive style.
