I tried to use your online complaint form to file a complaint of a year long problem with windstream. but your complaint form said to keep it to 1000 characters or less with is ludicrous. you were counting spacing as a character punctuation. i had over 1200 characters and didn't have room to properly show how huge the problem is . so the person receiving the complaint may not get the gravity of the situation. most people can search and type on the internet but add files paste what the heck does that mean you have to simplify the form more so we can properly articulate whats going on.
