

7520961385.txt

I strongly support the proposed rule changes. This does not change any bandwidth allocation, but seems that it would allow for more efficient use of the available bandwidths. Plus, it would allow us to better support local government and citizens in times of emergency in the amateur bands allowing the best formats possible - such as Winlink via pactor. Please allow use of modern technology in the amateur bands, please accept the proposed changes.

Cordially,

Scott Gray, KD4VVC
