I AGREE 100% WITH THE FOLLOWING COMMENTS:

The proposed change for RM-11708 does not alter current allocations for digital use (frequencies or bandwidth); as such, there should be no negative impact to existing or future amateur radio operators. Allowing the use of Pactor 4 would merely add a mode to existing allocations, thereby enhancing the capability to the currently allowed spectrum.

Please accept the forward-looking addition in RM-11708.
