I strongly oppose expanding the use of cell phone use on airplanes. It is difficult enough to sit through a loud conversation in the airport terminal, but having to put up with the many obnoxious and overly loud and attention-getting passengers with cell phones would be hell. I strongly encourage you to ban voice communication on cell phones and other electronic gadgets during flight. As you know there are enough distractions in the confined space of a plane capsule. People can wait a few minutes to call. Please DO NOT pass this proposed legislation. Thank you.
