Recently the FCC opened opportunity for LPFM to organizations, i.e. educational, religious, ethnics, non-profit, and etc. In Goshen, IN, I recently found out that we have a big necessity of information such as university, schools, information how to apply for scholarships, but we can't comply because we don't have resources like the radio. Especially for the Hispanic community. We would appreciate if the FCC can let us open a frequency in Spanish that the purpose would be to give out information possible, like going to college and with other local organizations to support all the young students in High school to prepare for college. The only reliable information we have is from South Bend, IN through Sabor Latino 93.5FM. And if possible we would like to have our own like station here in Goshen, IN, to more embrace the education. We would like if you support us.
