**Ex Parte Notice**

Ms. Marlene H. Dortch, Secretary  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: Reassessment of FCC Radiofrequency Exposure Limits and Policies, ET Docket No. 13-84;  
Proposed Changes in FCC's Rules Regarding Human Exposure to Radiofrequency  
Electromagnetic Fields, ET Docket No. 03-137

Dear Ms. Dortch:

On Monday, Dec. 2, 2013, the undersigned, on behalf of the Environmental Working Group ("EWG"), met with Commissioner Mignon Clyburn and Mr. Louis Peraertz to discuss the above-referenced proceedings. Specifically, we discussed EWG's interest in this issue from a public health perspective; the fact that Americans' exposure to cell-phone radiation is on the rise; studies concerning the potential health effects of cell-phone radiation, particularly for children; reasons why current radiation standards are inadequate and must be modernized to protect public health; and the importance of disclosing cell-phone radiation information to consumers.

In addition to discussing these points, EWG shared with Commissioner Clyburn and Mr. Peraertz a copy of EWG's original comments on the proceedings (filed Sept. 3, 2013); subsequent reply comments (filed Nov. 18, 2013); EWG's 2009 report on the issue; a letter signed by twelve public interest groups calling for more stringent standards; and a petition spearheaded by EWG calling on the FCC to strengthen standards, which garnered more than 25,000 signatures. We have attached these materials hereto.

Sincerely,

Heather White
