Subject: Cybernet 1 Connect America Challenge

Mr. Pedersen,

I was reviewing Cybernet 1's Connect America Phase I challenge and had a question. In your filing, you state that Cybernet 1 "provides speeds from 1 Mbps down and 1 Mbps up to 8 Mbps down and 2 Mbps up."

Could you clarify this statement for me? Do all of the challenged census blocks have access to 8 Mbps/2Mbps? Only a few do not have access to 8/1 they all have access to 3/1

Are there any census blocks challenged by Cybernet 1 that do not have access to speeds of at least 3 Mbps/768 kbps? No.

Thank you for your help.
