

I am opposed to allowing cell phone wireless use onboard flights. It is distracting, disruptive and offensive . We don't need more complications flying at an altitude of over 10,000 feet in air and have it come to a harmful situation for all people in the airplane. it is hard enough getting people to shut them off without attitude personality coming into play ...and anyplace where it is a rule to keep off and is well enforced needs to stay in these guidelines. Wasn't it last week a man was shot dead during intermission at a movie shot by a retired cop because he didn't shut off cell phone. Its clear and concise the way it is. Lets keep it this way PLEASE
