

To whom it may concern:

I would like to voice my disapproval of proposed changes in regulations that will allow modification to existing cell towers in the Adirondack Park without review or oversight. I would also carry that same opinion to all cell industry regulation, as the industry already operates in a vacuum, largely exempt from regulations that apply to most other industries. To allow the very companies that are operating and profiting from the infrastructure to be the ones who determine what is best is naive and absurd. It is my opinion that all cell phone construction and infrastructure should be subject to public comment, local municipal review and require local approval.

Sincerely,

James Zalewski
