

To the FCC:

I am a concerned United States citizen and New York State resident with a vested interest in protecting of the Adirondack Park. I am opposed to all actions the FCC has taken or plans to take which will terminate or lessen the already successful Adirondack Park Agency policy for the siting and modification to cell towers cell towers. The proposed FCC rule should exempt those areas that have established standards for cell towers. The Adirondack Park's scenic beauty and ecology has benefited from the protection of the APA standards for 12 years and it should continue to be protected in every way possible. The Adirondack Park is one of our nation's very special, very valuable scenic and historic resources and because of this, a generic nationwide plan for cell tower expansion will not work.

Do not wipe out the APA established standards.

Respectfully,

Anita Wortman
