Dear Ladies and Gentlemen,

I would like to send you herewith my comments regarding the FCC Application to Discontinue Domestic Service of Jajah, whereby I am referring to the § 63.71 Application of Telefonica Digital, Inc., d/b/a/ Jajah.

My comments are as follows: I am a scientist located in Germany and working together with other science colleagues on an international level covering North America, Argentina, Europe, Japan, South-Corea, China.

It is evident that I have to make many phone calls linking me to numerous colleagues in different countries. The Jajah service is very convenient, economic and efficient. A discontinuation of this service would seriously damage our capability of world-wide communication with my collaborators and co-authors. Unfortunately I am unable to receive an equivalent service or a reasonable substitute from another carrier. I therefore wish to object to the proposed discontinuation of the Jajah Service.

With best regards,

Dr. Rued Lechner
