Comment: As a passenger I am annoyed having to be subjected to other peoples' conversations which will be carried on at all times of the day and night. People can be downright rude and develop a sense of entitlement that their business is the most important business in the world. Why let it get to that point?

As a retired flight attendant (40 plus years of service) I can not imagine the mayhem that may ensue if people are allowed to talk on their cell phones. I had to play referee too many times to know that one more irritant is not needed. People are already irritated in today's jam packed airplanes. Why put a crewmember in more jeopardy? A former policeman was recently arrested for killing a man who was texting in a movie--and you think a conversation could not be deadly?

There are many, many locations where cell phones have been banned--and for reasons too many to enumerate--why even consider the tight, enclosed space of an aircraft.
