I would like to express my concern of the proposed Time Warner and Comcast Merger. Consumers already have a limited to no choice in cable and internet providers. Each area only has one cable company and one company owns all the lines. There are no comparable internet services as DSL is the only alternative in most areas and is far inferior to cable. Fiber is nowhere near being as available as cable. Comcast would now own the majority of this countries cable and internet customers. They already have questionable business practices abusing current (or lack of) net neutrality laws. There is ZERO benefit to consumers with this proposed merger and I think if the FCC really cares, they will come through like they did for the ATT and T-Mobile merger and block it.
