I am the managing member of AM Guys LLC the owner of WZUM. WZUM is a 1KW day and 4 watts night station in the Pittsburgh Area. All of the FCC's suggested changes are welcome. While an AM only FM translator filing window would be nice, there are not many open frequencies in larger markets. I would like to suggest the FCC open the filing window with a relaxed set of separation rules allowing more AM stations to take advantage of the window. With our 4 watt signal, we really do need the help of a FM translator.
