RE: Docket #12-268

To Whom It May Concern:

Maryland Sound International is a world leader in providing large scale sound systems for highly visible events. Examples are The Inauguration of the President of the United States (for the past 5 Inaugurations), Times Square New Years Eve (for past 16 years), NBC's Dew Action Sports, Pink Floyd, Josh Groban, Neil Diamond and many others.

We invested heavily in replacing wireless microphones and ear monitors in order to comply with the FCC's mandate to vacate the 700 megahertz band. It would be a significant financial hardship if we had to replace this equipment again before the end of its useful life. We support Sennheiser's petition for the winners of forthcoming auction spectrum to compensate wireless microphone owners for equipment rendered obsolete by spectrum re-packing.

Sincerely,

Robert Goldstein
President
