Tom Wheeler, Chairman  
Federal Communications Commission  
445 Twelfth Street SW  
Washington, DC 20554

Re: *Revision of Part 15 of the Commission's Rules*  
ET Docket No. 13-49

Dear Chairman Wheeler,

I am the owner of Satellite Phone Solutions, based in Boca Raton, Florida. My company sells and leases Globalstar products and services, including both its satellite phones and SPOT personal tracking devices. We are one of the few companies that focuses on leasing, rather than selling, Globalstar's products. I have been working with Globalstar for many years and am very familiar with their history.

I understand that, in the above referenced proceeding, the FCC is currently considering whether to allow cable companies to utilize Globalstar's spectrum to provide wireless services. I am writing to you to request that you not allow any cable services that would impact Globalstar's commercial operations.

Satellite Phone Solutions recommends Globalstar's products and services to people who are traveling to remote locations of the United States and internationally for work and recreation.

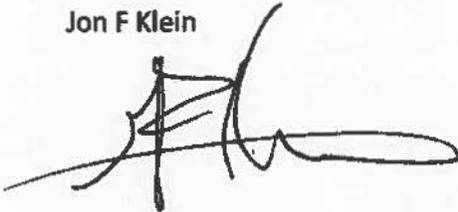

**We support people throughout the Rock Mountains, Boy Scout Troops traveling to the Boundary Waters of Northern Minnesota, mega church groups providing relief efforts and mission work both domestically and internationally, hunters in Texas near the Mexican border and Virginia State Forest Rangers located in the Appalachian Mountain Range.**

**All of my customers depend on Globalstar to provide communications when no terrestrial service is available. We personally test every Globalstar phone that we rent and can state unequivocally that Globalstar's voice quality is the finest in the industry. Over the last 6 months, we have noticed a dramatic improvement in Globalstar's service quality, and are hearing positive feedback from our customers regarding their user experiences.**

**Please protect Globalstar's services from any harm that could be caused by other companies using Globalstar's spectrum.**

Sincerely,

**Jon F Klein**
