

Reclassi fy The Internet As A Common Carrier.

It is not fair or just that an internet carrier, that I pay for service and is basically the only company that I had as a choice for internet service, can throttle the speed of content delivery from the company (in this case Netflix) I choose to subscribe to just because the said internet company offers a competing service which they are trying to force me to buy. Since I am paying for their service and I am an adult, it is also not just or right that they can censor what I see depending on how much they are getting paid in their backdoor deals. Thank you.
