Reclassi fy The Internet As A Common Carrier.

The FCC must use its administrative power to correct the error made by the US Appeals Court in the District of Columbia on January 14, 2014 and threatens the neutrality of the Internet. The court's decision was based on a technicality that the Internet is not a common carrier. The FCC regulates communication systems, clearly the heart of the Internet is communications and, as such, it should be governed by the rules set by the FCC! The FCC has all the power it needs to correct this error of oversight.

Please, please, please: reclassi fy the Internet as a common carrier!
