Reclassi fy Internet Servi ce Provi ders As Common Carri ers.

I am a retiree who lives in a wintry rural area. Since television switched to digital I get only spotty reception on a couple of channels. Often my driving is limited. Internet access can bring me the world or it can censor it from me. If only companies and wealthy individuals can afford a high charge of doing business on the web then I may not have access to educational, political, health, or business sites that I need.
