Dear Sir/Madam:

The internet needs to be available at ALL Public Schools beginning with Pre K. Opportunities abound for small businesses to engage in their communities where it is not available but, are not widely promoted as possible contracts.

I urge you to create a competitive market for these opportunities by working with local governments to promote the projects and promote competition so existing cable companies like Comcast and Time Warner don't dominate the environment and hold up our progress because of their priorities.

Urge agencies on all levels to distribute news of RFPs using all channels, including social media which is now a popular way for people to learn about opportunities.

You need to stimulate competition in the communications industry for the sake of our Economic future.

Sincerely,  
Yvonne Reyes
