Reclassi fy Internet Servi ce Provi ders As Common Carri ers.

Domestic spying has already cost corporations billions for clouds no one will use because they know they are not secure from our government spies. Why would you allow the same corporations to control an internet they do not own. It will kill the internet, kill the corporations who enrich themselves from spying on their own clients' habits and who are morally bankrupt. DO NOT GIVE THE INTERNET TO CORPORATIONS PLEASE. YOU DO NOT OWN IT AND NEITHER DO THEY. thanks. Can we be done wi th this?
