Please reject the proposed Comcast/Time Warner Cable merger. I am tired of ever-increasing cable rates, slow broadband speeds, and lousy customer service.

We need more competition in the cable and Internet marketplace, not less, and this mega-merger will result in a Comcast conglomerate that will dominate cable and broadband in our nation -- leading to higher prices, fewer program choices and even worse customer service.

If you allow this merger to go through, Comcast will:

- *Control two-thirds of the nation's cable subscribers, five times any other cable company and 50 percent more than the largest satellite TV service.

- *Control nearly 40 percent of the U.S. broadband market.

- *Force content providers to pay more to get their programming on, passing those price hikes on to customers.

- *Combine two companies that already rank at the bottom of the American Consumer Satisfaction Index based on surveys with over 70,000 consumers.

Please reject the Comcast/Time Warner Cable merger, and give American consumers a break.
