Re: WC Docket No. 10-90
 Rural Broadband Experiment Expression of Interest for Price Cap Areas

Dear Federal Communications Commission,

Company History and Description

Kayse Wireless serves the Lake Arthur, Louisiana area with Broadband Wireless Services, currently serving about 250 customers. There has been interest from at least another 200 subscribers. Kayse Wireless would like to provide broadband to a greater footprint in the Jefferson Davis Parish. Portions of the northern half of the Parish are wooded and prevent a full deployment of wireless broadband. Fiber to the Home (FTTH) would be an ideal solution for potential rural broadband customers.

Kayse is committed to providing Broadband Internet to Rural Areas. Rural Wireless Internet is available now in some areas and we are expanding out Wireless High Speed Internet to more areas every day. Bringing over 15 years of Networking and Customer Support to the table, Kayse Wireless has created a whole new way customers experience the internet. Kayse is Taking Customer Service to a "Business Class" Level by offering automated billing options, Customer Portals and an extensive Network Monitoring System. Our platform is encrypted to ensure secure data delivery and exceptional reliability.

Participation in the Rural Broadband Experiment with the Connect America Fund gives Kayse Wireless the best chance to provide High Speed Broadband Internet for Rural Louisiana.

Proposed Service Areas

State	County	CountyName	TractID	Eligible High	Extremely High Cost	Annual Support
				Cost Locations	Locations	
LA	22053	Jefferson Davis	22053000100	645	92	\$ 310,570
LA	22053	Jefferson Davis	22053000200	663	91	\$ 281,931
LA	22053	Jefferson Davis	22053000300	300	33	\$ 169,402
LA	22053	Jefferson Davis	22053000400	389	47	\$ 149,559
LA	22019	Calcasieu	22019002000	604	60	\$ 243,535
LA	22113	Vermilion	22113950200	673	45	\$ 291,318

411Lake St. Lake Arthur, LA 70549
888.337 .3585

Proposed Technology

Kayse would like to deploy Fiber to the Home, in a Passive Optical Network configuration initially. The Network will be designed to evolve into an Active Ethernet Gigabit Network. Kayse will also continue to expand its fixed wireless footprint in areas too costly to reach with fiber.

Proposed Service Offerings and Pricing

Kayse Fiber Pricing Plans

5X5	34.99
10x10	44.99
15x15	54.99
25x25	64.99
50x50	74.99
75x75	84.99
100x100	94.99

Network High Level Cost Estimate

To establish a fiber backbone throughout Jefferson Davis Parish, the Eastern target Census Tract in Calcasieu Parish and the Northwestern Census Tract of the Vermilion Parish will require 89 miles of fiber estimated at \$30,000 per mile or \$2,670,000. To deploy a Network to serve the majority of the 3642 High Cost subscribers in the target tracts would approach \$6300 per subscriber or just over \$23,000,000.

At a minimum, Kayse would bring Fiber to the Home to the towns of Elton(469 households), Welsh(1216), Gueydan(644), Iowa(963), Fenton(141), and unincorporated areas Roanoke and Lacassine. All but Iowa fall into funded areas. If a 30% penetration rate is achieved, and drops are only built to subscribers, the Network build would be an additional \$5,500,000 over the backbone investment for a total of \$8,170,000.

Timeline

The backbone and initial service area could be built out over a two-year period.

Local Support

There has been great interest in broadband, as in most of the target funded areas, only Hughes satellite service is available, with best effort and non-broadband speeds for the most part. Kayse would be introducing the only broadband service in these areas.

Additional details can be provided upon request, and Kayse Wireless appreciates the opportunity to participate!
