In regard to Streamlined Program Administration - Elevonix has developed and is publishing www.EzRatePro.com - a SaaS, cloud based, compliant E-Rate planning, submission and tracking application. An intuitive, user friendly navigation leads districts and libraries through technology planning, voting, funding requests, contract tracking and forms 470 & 471 auto-generation. I suggest it be considered as a standard moving forward as the business rules and logic have already been automated and the platform has infinite scale.
