

Edward R. Breneiser, WA3WSJ

Hello,

I'm against RM-11708. It will put an undue burden on thousands of amateurs who love to operate in the CW and PSK31 sub bands.

RM-11708 is not about spectrum efficiency. It's about allowing wide 2.8khz signals to rip apart the sub bands where we truly have spectrum efficiency.

Edward R. Breneiser, WA3WSJ
