

7521098810.txt

I am against RM-11708 as proposed by the American Radio Relay League (ARRL). I am a member of the ARRL and have maintained my amateur radio license since 1994.

This proposal does not serve the greater good of amateur radio. RM-11708 should be denied. The current narrowband modes we have today should continue to be protected by FCC rules.
