I am extremely disappointed in the Chairman's proposal allowing fast lanes on the internet. Did the Chairman forget that he doesn't work for the telecoms anymore? He works for us now. We want real net neutrality. How dare he give away the internet to the ISPs? I'm disgusted. I'm going to continue following this closely and complaining to my elected officials.

You need to abort this plan immediately and reclassify ISPs as common carriers under title II.
