We need the internet declared a Title II telecom. Or treated like a public utility. They wouldn't let the electric company lower the Kwh to your house because they don't like what kind of refrigerator you bought.

So why are we allowing area based monopolies such as Comcast and time wanner to do it?

Oh right Tom wheeler used to work as a lobbyist for them.
No conflict of interest at all.

Nice way to get a nice fancy job just like Meredith Attwell Baker did.

In mid-May 2011, she announced that she was taking a job with Comcast, effective June 3, 2011, instead of completing her term on June 30.
