It is my belief that Tom Wheeler should step down from his position at the FCC due to prejudice. He was formerly a lobbyist for cable a company(ies) and now he wants to turn over control of the internet to those same companies he used to work for. This would be detrimental to the citizens of the USA and the world. The rules he has proposed should not be put in place because of this result. Please stand up for the rights of Americans regarding the internet and how it has functioned for all these years. Thank you.
