In regardsto the Comcast and Time Warner Cable merger , I would like to express my extreme anger and disgust at this blantant political manipulation that even allowed this merger to be put on the dockett. Allowing this to go through would be creating the kind of monopoly that we, as a nation, have stated many , many times is not desired. The poor quality of service would plummet while rates only increase, because what other choice is there? We live in a world where if you do not have a computer, you are left behind. Having a monopoly as an internet provider practically ensures that no one who is not rich enough ever get anywhere in this country. please allow your moral side shine through on this issue. Do not allow the merger of Comcast and Time Warner.
