I totally agree with the following submission:

7521100769.txt

- Please do not repeat the mistakes that were made in privatizing TV broadcasts and cable television. The Internet has been a great tool for creating and spreading democracy and empowering individuals. It was developed and built by the American taxpayer. We all have equal right to its use. It must not belong to the highest bidder.

Please reclassify internet service providers as common carriers because that is exactly what they are they are a utility. Any other classification will be a disservice to the American people and would show a corrupt bias towards limited, private ownership.

Must every public asset be sold off to private enterprise for profits for the few?
Really.

Please do not commit this disservice to the American people.
