Comcast and TWC are the number 1 and 3 biggest ISPs in USA. They often can buy out local municipalities to pass laws that only them to be the only cable provider in Cities and Towns. They can also bribe apartment buildings to offer only their services to their tenants. This leaves us the citizens with very little choice and often no choice at all for an ISP that has competitive pricing and services. This merger will only allow Comcast to become even bigger and have more power to bully local municipalities. This will lead a monopoly that can't be stopped and will only leach on the life blood of our country. We can not allow this merger to happen.
