Re: Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions, GN Docket No. 12-268; Amendment of Parts 15, 74 and 90 of the Commission's Rules Regarding Low Power Auxiliary Stations, Including Wireless Microphones, ET Docket No. 10-24, WT Docket Nos. 08-166, 08-167

Dear Ms. Dortch:

On April 30, 2014, I met with Brendan Carr, Legal Advisor to Commissioner O'Rielly, regarding the above-referenced proceedings. Representing Broadcom Corp., Google Inc., and Microsoft Corp., I requested that the Commission: (1) set technically reasonable guard bands of no less than 10 MHz and a duplex gap of no less than 11 MHz to protect against interference between licensed services and to allow the development of sub-1 GHz unlicensed broadband services in those bands; (2) maintain one or two broadcast channels per market for shared operations between wireless microphones and unlicensed broadband operations, in which wireless microphones may make reasonable channel reservations; (3) not expand the list of entities eligible for Part 74 wireless microphone licenses at this time; (4) not allow wireless microphone operators to reserve channels in any guard band or duplex gap frequencies where broadband unlicensed operations are possible; and (5) permit unlicensed broadband operations in Channel 37.

Pursuant to the Commission's rules, a copy of this notice is being filed electronically in the above-referenced proceedings. If you require any additional information please contact the undersigned.

Sincerely,

Paul Margie
