Re: *Open Internet Order* Remand Proceeding (GN Dkt. No. 14-28)

Dear Ms. Dortch:

I am writing pursuant to Section 1.1206(b)(2) of the Commission's Rules to notify the Commission that on Thursday, May 1, Jeffrey Campbell of Cisco Systems, Inc. ("Cisco") and the undersigned participated in one meeting with Rebekah Goodheart and Stefanie Frank of Commissioner Clyburn's office, and another meeting with Priscilla Argeris of Commissioner Rosenworcel's office – to discuss the above-referenced matter.

During the two meetings, Cisco noted that recent decisions made by foreign governments threaten to undercut innovation and investment in the broadband Internet ecosystem. These governments will be closely watching this proceeding as it unfolds in the United States. Cisco emphasized that the "specialized services" exemption was an extremely important component of the balance struck by Commission's 2010 *Open Internet Order*, and should be retained in any future regime. Further, Cisco urged the Commission not to pursue a constricting definition of "specialized services." Rather, in order to accommodate the quickly evolving and still-nascent market for managed offerings, the Commission should focus on an approach that promotes the development and deployment of specialized services that will benefit consumers without impacting broadband Internet access services. Finally, Cisco discussed an approach under which "specialized services" might be defined to include any IP-based services that are not broadband Internet access service. Cisco stated that this approach could be workable so long as it was applied flexibly to accommodate ongoing technological and market developments.

Respectfully submitted,

/s/ Russell P. Hanser
