I urge the FCC to reclassify broadband internet as a common carrier telecommunications service and preserve Net Neutrality. Only corporations can benefit from its elimination. I call your attention to your own mission statement: "To make available so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, rapid, efficient, Nation-wide, and world-wide wire and radio communication services with adequate facilities at reasonable charges."
