Subject: Net Neutrality. Please protect our internet freedom and abolish and block any law or action that would change the current freedoms we currently enjoy in our Net Neutral internet. It is paramount to our future and freedoms to prevent any Internet Service Provider from creating laws or actions that would undermine our internet by charging extra for special access or "faster" speeds. Please deny any request by Comcast, Time-Warner, Verizon, AT&T, or Cox to abolish or change the existing current internet rules as they currently stand, in fact, enacting a law that would preserve our current internet freedoms is required to once and for all squash the very notion that ISPs should become middlemen to our data.
