It has become time to classify Internet Service Providers as Title II Common Carriers. The possibilities for abuse are just too great otherwise. Failure to do so will cripple the future economic well being of the United States, stifle innovation, and limit the freedom of consumers to choose the content they desire. The FCC should strive to protect the average American citizen. Anything other than open internet or common carrier status would harm the everyday well being of the average American in the name of increased profits for major internet service providers.
