I'm commenting to urge Chairman Wheeler to scrap the FCC's plan to allow Internet service providers to charge for preferential treatment. These rules would destroy Net Neutrality. I urge the chairman to throw them out and instead reclassify broadband as a telecommunications service. This is the only way to restore real Net Neutrality.

As members of the FCC, I can only hope that you keep the best interests of the people in mind and stand on the principles that the Internet should be without restrictions provided by the various Internet service providers across the US. It encourages monopolies, corporate greed/government influence, and is completely unnecessary. Please reconsider so we may continue to allow for the Internet to be as accessible as possible to citizens across our country.
