To whom it may concern,

In recent I have heard the debate over net neutrality. With an eye to the future and a desire to keep the internet neutral for all I request that there be no preference for one site or another because of bandwidth usage or site traffic. Yes it places a load on the IPS but they are paid well for it.

The FCC should reclassify broadband internet as a telecommunications (or "Common carrier") service.

Right now broadband is regulated like TV or radio, which doesn't make sense. It is my desire that the internet be kept open for all and for all to have an equal voice. Thank you and hopefully we make the right decision now for the future.
