To FCC Commissioners,

I urge you to reclassify broadband internet as a telecommunications or "Title II common carrier" service, instead of leaving it to be regulated like TV or radio.

Your proposed path would open the door to widespread discrimination online. It would give Internet service providers the green light to implement pay-for-priority schemes that would be a disaster for startups, nonprofits and everyday Internet users who cannot afford these unnecessary tolls.

I urge you to scrap these proposed rules and instead restore the principle of online nondiscrimination by reclassifying broadband as a telecommunications service.
