

7521111297.txt

Hello there. I wanted to take a moment of your time to express my concern for the ongoing news about the end of net neutrality. I am by no means an activist. This is literally the first time I have ever sent a message of displeasure regarding an issue. This is an issue I decided I couldn't just sit by and watch happen.

If net neutrality ends, billion dollar corporations will do everything within their power to dampen the free flow of information we see today over the internet. The merger of Time Warner Cable and Comcast show just how big this is for these companies. They want to control it all, and if we let them, they will ruin it.

FCC I ask of you, please reclassify broadband internet as a title II common carrier telecommunications service.

Thank you for your time.
