Net neutrality is important to us all, so please reclassify broadband internet as a title II common carrier telecommunications service. No company should be able to limit the data stream of the internet. What if power companies decided to dramatically limit the amount of wattage delivered to your home, but gave you the option to return to the normal wattage at an increased price. This process increases class division by promoting an elitist system. These aren't the values which this nation was founded on.
