Please do not end net neutrality, we as a customer and a user should be allowed unlimited usage of this service that not only helps us do wonderful things like start up fundraisers, publicize our thoughts and feelings to the world via blogs and or vlogs and have access to communicate directly to people all over the world and by ending net neutrality you potentially cut off this access to people like that one dishwasher that works double shifts at ihop and doesn't have the money to pay for high speed internet access so they go to their local library to check on emails/their bank account etc. and the library couldn't keep up high internet access speeds and pay for various services thus cuts off their access at the bare minimum and thus allows said dishwasher person to not be able to experience all the things a person that has the money to pay for internet would.
