Re: FCC
From: Citizen of the United States of America

Do not allow any private companies, communication or indeed any other to block, obfuscate, or otherwise censor public domain and knowledge simply because they want to make more money to bribe you ignorant, blundering oafs.

You public servants work for us, start acting like it! Never mind that you pay yourselves a King's ransom in salary and perquisites.

If any of you are uncomfortable with getting off of your well-fed hind-ends and actually do something to serve this country, if you would prefer to continue to behave as though a collection of greedy self-whoring cowards feel free to find the nearest speeding bus, and please do step in front of it.

Sincerely, A Pissed-Off Citizen.
