Reclassi fy broadband i nternet as a title II common carrier tel ecommuni cations servi ce!

I don' t trust big ISPs to their word. The single goal of a corporation is to make money at all costs. They are interested in the money their shareholders make, and nothing else. It is for this reason that pushing for Net Neutrality is of the utmost i mportance. Allowing to regul ate the i nternet could qui te possi bly stagnate a l arge amount of creative momentum we will witness i n the comi ng years.
