It is necessary to classify Internet Service Providers as Title II Common Carriers. There exists the very real possibility for abuse that will stifle the future economic wellbeing of the United States, stifle innovation, and limit the freedom of consumers to choose the content they desire.

The fast-lane idea of the ISPs is little more than throttling the throughput or access of sites they don't like or that won't pay. This would be a horrible change for the Internet, and would be a disaster for US citizens.
