Public services are for all of us, not just the few with money to influence. Creating a new revenue stream for companies who already take a lion's share of our hard earned money is abhorrent and shameful at best. Please do not allow moneyed conglomerates to chip yet another major chunk of freedom away from the rest of us who are not as fortunate as those who can wield money and sway power. If any of you still believe in a government of, for, and by WE THE PEOPLE, you will not allow net neutrality to be destroyed.
