

7521112604.txt

Why am I writing my government in a desperate attempt for them to do their job?  
It's a no brainer for you to keep the internet free from the interests of  
corporations that seek to profit from it's restructuring.

Stop this nonsense now. You know it will hurt the people of America, not to mention  
the flow of world wide information. We are not fools. We know how this ends.  
Introduce regulations NOW that protect the internet from corporate exploitation and  
keep it where it belongs - in the hands of the people. Now and forever.
